Key EDA Findings

1. Chart 1 — NAV Growth

Equity funds showed strong NAV appreciation during the 2023 bull run, with large cap funds gaining 20–25% on average, followed by a correction in mid-2024.

2. Chart 2 — AUM Dominance

SBI Mutual Fund leads AUM across all years, maintaining consistent dominance with over Rs.12.5L Cr in assets under management.

3. Chart 3 — SIP All-Time High

SIP inflows hit an all-time high in Dec 2025, reflecting growing retail investor participation and increased financial awareness.

4. Chart 4 — Category Inflows

Equity funds consistently attracted higher net inflows compared to debt funds across all months in 2022–2025.

5. Chart 5a/5b — Age Demographics

The 30–45 age group dominates the investor base, contributing the highest SIP volumes across all fund categories.

6. Chart 5c — Gender Gap

Male investors account for ~65% of transactions, indicating significant room for growth in female investor participation.

7. Chart 6a — Geographic Concentration

Maharashtra, Delhi, and Karnataka account for the majority of SIP investments, reflecting strong T30 city concentration.

8. Chart 6b — T30 vs B30

T30 cities dominate transaction volumes, though B30 cities show growing participation driven by digital investment platforms.

9. Chart 7 — Folio Growth

Industry folios nearly doubled from 13.26 Cr (Jan 2022) to 26.12 Cr (Dec 2025), reflecting strong mutual fund penetration across India.

10. Chart 8 — Return Correlation

Large cap funds show high pairwise correlation (>0.85), suggesting similar portfolio compositions and limited diversification benefit.

11. Chart 9 — Sector Allocation

Financial services and IT sectors dominate equity fund portfolios, together accounting for over 40% of total sector allocation.

12. Chart 10 — Risk vs Return

Equity funds offer superior 5yr returns (15–24%) compared to debt funds (5–8%), with proportionally higher volatility.

13. Chart 11 — Top Performers

Small and mid cap funds dominate 1-year returns, outperforming large cap peers by 5–8% during the 2024–25 recovery rally.

14. Chart 13 — Sharpe Ratio

Mirae Asset and Axis Mutual Fund consistently deliver above-average risk-adjusted returns across their fund offerings.

15. Chart 15 — Max Drawdown

Small cap and sectoral funds exhibit the highest maximum drawdowns (>30%), highlighting their higher risk profile for investors.
